

Ahmad Chairiansyah

Fullstack Developer

Jakarta, Indonesia | +6282260683030 | ahmad.chairiansyah@gmail.com | [LinkedIn](#) | [Github/Portfolio](#)

SUMMARY

Fullstack Developer with 1.5+ years of professional experience building enterprise-grade applications across multiple industries. Proficient in TypeScript, Next.js, Fastify, Hono.js, and PHP/Laravel with expertise in distributed systems, browser automation, and AI integration (LangChain, OpenAI). Experienced in designing scalable backend architectures with message queues (RabbitMQ, PgBoss), managing complex database schemas, and delivering full-stack solutions in cross-functional team environments.

EDUCATION

Hacktiv8

Full Stack JavaScript Immersive Program ([Transcript](#))

Jakarta, Indonesia

September 2025 – December 2025

Syiah Kuala University

Bachelor of Informatics (GPA 3.77/4.00)

Aceh, Indonesia

2020 – 2024

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Mobile Development Cohort

Bandung, Indonesia

February 2023 – July 2023

WORK EXPERIENCE

PT Neuron Teknologi Indonesia

Fullstack Developer

Jakarta, Indonesia

February 2026 – Present

- Build and maintain a Social Media Automation Platform (Nx monorepo) using Next.js, Fastify, PostgreSQL, and Redis, supporting automated interactions across 8+ social media platforms
- Develop distributed task queue system with PgBoss and browser automation workers using Puppeteer with stealth capabilities and proxy rotation
- Implement campaign management dashboard and real-time queue monitoring with Prometheus metrics for system observability
- Integrate OpenAI API for AI-powered contextual content generation with configurable tones and multi-platform targeting

Nodewave

Backend Engineer

Jakarta, Indonesia

August 2024 – May 2026

- Develop and maintain backend systems for 3 enterprise applications across different industries (construction, transportation, water utility) using TypeScript/Hono and PHP/Laravel with PostgreSQL and MySQL
- Implement document workflow system with digital signature integration, multi-level access control, and RabbitMQ-based background processing for a major Indonesian infrastructure company
- Build AI-powered features including RAG chatbot (LangChain + Qdrant), driver performance recommendations, and Japanese speech-to-text integration for a taxi fleet management platform
- Design financial/accounting modules following Indonesian government standards including double-entry bookkeeping, fixed asset depreciation, and automated report generation

Syiah Kuala University (Internship)

Backend Engineer

Aceh, Indonesia

August 2023 – December 2023

- Architected and developed a Scholarship Management System using Laravel 10, serving 13 faculties with role-based access control for admins, faculty operators, and students
- Designed database schema with flexible JSON-based per-faculty quota allocation, ULID primary keys, and dual-guard authentication system (admin NIP + student NPM)
- Implemented end-to-end scholarship workflow including document upload/validation, multi-stage approval process, and automated PDF/Excel report generation (DomPDF, Maatwebsite)
- Coordinated with frontend developers and academic staff to digitize manual paper-based scholarship processes, enabling online applications and real-time status tracking

SKILLS

Language: JavaScript, TypeScript, PHP, Kotlin

Frontend: React.js, Next.js, Redux, Zustand, TanStack, Tailwind CSS, React Native, HTML & CSS, Apollo Client

Backend: Node.js, Hono.js, Fastify, Express.js, Laravel, Prisma, Kysely, Sequelize, Drizzle, PgBoss, Puppeteer, PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ, GraphQL, Apollo Server, RESTful API, Zod, Pino

Tool: Git, GitHub, Docker, AWS (S3), Nx, Prometheus, Postman, Figma
